

Details:

Historically, in 2016, the First United Nations CSD side event on Smart Aging co-sponsored by Waseda University, UNCSA and the Japanese Ministry of Internal Affairs and Communications was held at the UN Headquarters in New York, and then in 2018, the Second UN CSD side event co-sponsored by the above same Institutions on the issues of "Aging Society-Promotion of Employment for the ageing through Digital ICT Utilization". In 2020, the 3rd UNCSA side event by the above same group was organized on the topics of "From Smart Home to Smart City".

Co-sponsors were Waseda University and UNCSA together with the Japanese government, International Academy of CIO and NGO Committee on Ageing, and it received a very high reputation worldwide.

In 2021 the role of digital is reconsidered in the spread of the new coronavirus infection. Under these circumstances, we discussed the role of digital technology toward the achievement of SDGs in pursuit of the well-being of all people including the ageing, who have both a large digital and income gaps.

In 2023, we just applied the side event as mentioned in the forms and approved by UNCSA.

The organizers and sponsors will be as follows:

- @ Waseda University,
- @ Japanese Government (Ministry of Internal Affairs and Communication),
- @ International Academy of CIO,
- @ APEC Digital Government Research Center,
- @ Smart City and Community Innovation Center,
- @ Ageing Research Institute for Society and Education;
- @ SDG City Lab
- @ NGO Committee on Ageing

Please see both the FLYER including distinguished speakers and Concept note for more information.
